

Grow Abundance

Abundance means having more than enough, an *overflow*

Abundance can be of wealth, opportunities, love, peace, health, support, creativity, spiritual power, luck, freedom, etc. However, as humans, **money** becomes our most basic necessity to fulfil other basic necessities. The most basic human needs are food, water and shelter, and to buy those things one needs money. Even in chakra system, the journey is supposed to begin with the healing of the root chakra, that is stability, security, safety and physical body. And in today's world money is what brings stability, security, safety and the basic necessities to maintain the physical body.

Spiritually, abundance is a state where energy, prosperity and blessings flow **continuously**. When people aim for money, they usually manifest a one-time thing. The word during manifestation that needs to be focussed onto is "abundance" to maintain continuity of flow.

Money energy

Everything exists as energies in the spiritual realms. Think of it as a huge infinite land, and every energy having a home of its own. In those houses, the sub-energies of the main energies have then different rooms. This is just for a visual aid, however, in reality they all have different realms, planes and dimensions.

First and foremost, why most manifestations fail is because people assume putting it out into the Universe through prayers, manifestation boards or spells is enough. But it comprises of only 50% of the work, the remaining 50% is what you do in the physical reality. You have to find a medium to make money and "WORK" physically for that medium to translate the channelled energies into physical cash.

Money Energy is pure, bright and yellow gold in its colour. Its thick liquid gold, fully opaque. But it is extremely high vibrational. Holding its energies requires one to vibrate at least at 5th dimensional frequency. However, the sub-energies of money can easily be channelled.

The Energies of Money

Money Energy and the Energies of Money are two different categories of Energies. The Energies of Money are the sub-energies of money. Basically, these are the characteristics of money but in the form of Energies. Without these energies, money won't come. These energies together make money. Money is a 10th dimensional frequency, while these energies are 5th to 7th dimensional energies. These are easily accessible and once they have come and cleared the path, money starts to flow in freely. You can also see it as natures you need to inculcate or characteristics you need to imbibe for the money to flow in. One of the laws of manifestation is that you need to become that which you wish to manifest. By becoming these sub-energies of money, what you become is a **money magnet**.

Growth

Growth is upward movement. It is a vertical expansion (increase, elevation). Growth means multiplication. Collapse is the opposite of growth. When you are not growing, you are either collapsing or maintaining stagnancy. Without the thoughts, feelings, emotions and Energies of Growth, Money will not flow in. One of the biggest reasons for that is that Money leads to growth. And growth is why Money is needed. They don't exist without one another.

Movement

Movement is the horizontal circulation (exchange, distribution, connection and transaction). In order for you to have money someone needs to give it to you in exchange for something you give to them. Money is constantly moving. Movement of money leads to its growth. But if, however, you choose to put it in the locker, it will stop growing. Using money will grow money. It is in its nature to move, and if you block its movement, it will get blocked too. Also, if you are too scared to move (move out of your comfort zone, move out of your house, move out to "work"), the money too will not move. Money cannot come to you without movement. You have to move money out for it to come in. Like in business, you cannot expect to start up a business without putting in money.

Flow

Money needs to flow, its fluid. It is not a stagnant energy, therefore if you wish abundance of money (which basically means overflow of money) you need to allow the money to flow. Holding onto it out of fear of losing it breaks its flow. You cannot treat money like kite, tightly controlled by a thread in your hand. Money is meant to move, flow, expand and return. The tighter you grip it, the less freely it flies.

Transformation

Money is the fastest transforming energy in the Universe. Money was never naturally existing; it got created with the evolution of the mankind. Its job was to transform itself into whatever the humans wanted. If you do not transform money (exchange), it loses its movement. Your skill/labour gets transformed into money as your income and you then transform that money into buying things. Money can transform itself into anything you want, provided you have the needed amount required for the thing you want. Money has the power to transform your desires into reality. But for that the right value of money is required. That is why money needs to keep growing.

Freedom

Abundance comes with freedom. Without freedom abundance won't come in. Period! You want abundance of love, you need to open yourself to receiving love from many. You want abundance of money, you need to open yourself to receiving money from everywhere. But also, you need to free the money to flow. If you try to control its flow and movement, it will leave you. money doesn't like control. Money gives freedom and liberation. Financially independent people never take permission before spending. The same way, money needs the freedom to move. If you restrict its movement, you restrict its flow. This leads to either eventual collapse (poverty) or worse, stagnancy. Why I call stagnancy worse is because at least in poverty people are motivated to earn money. In stagnancy people often get comfortable.

Money *blocks*

Whenever you call upon an energy, the energy comes instantly. However, what stops it from reaching you are internal (psychological) blocks, external (evil eyes, psychic attacks, etc.) blocks, and karmic blocks. When blocked, these energies get stuck and eventually either transmutes into something else or someone knowingly or unknowingly takes it away.

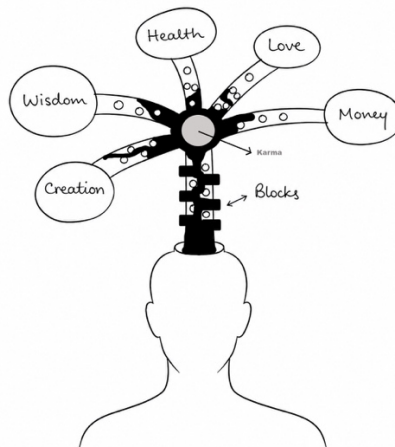

The first step of manifestation is therefore removal of blocks. And you can only remove what you know. Therefore, begin by calling upon Goddess Veritas and asking her to show you all the blocks to that which you desire. Then you call upon the appropriate Deities and create appropriate prayers for the removal of the blocks.

The internal blocks will have prayer focussed on psychological cleansing and reprogramming of the mind.

The external blocks will have a cleansing prayer for the removal of energy attacks.

And the karmic blocks will have a prayer focussing on learning the lessons, which would be similar to the internal blocks prayer.

No matter what you do and believe, until you remove the blocks to manifestation, you cannot manifest. This is a fact and there is no way around it. Blocks stop the receiving of the energy.

All the invited energies get filtered by the Karma. It decides whether the energies can enter or not. Post crossing Karma, the next blocks experienced in the Divine Channel are the internal or external blocks.

Stability – the biggest block

The fear of failure, the fear of lack and the fear of change – all leads to the need, will, want, wish and desire for stability. Most decisions of ordinary human beings are based on wanting stability in life, marriage being the biggest proof of that. You cannot expect growth and stability are the same time.

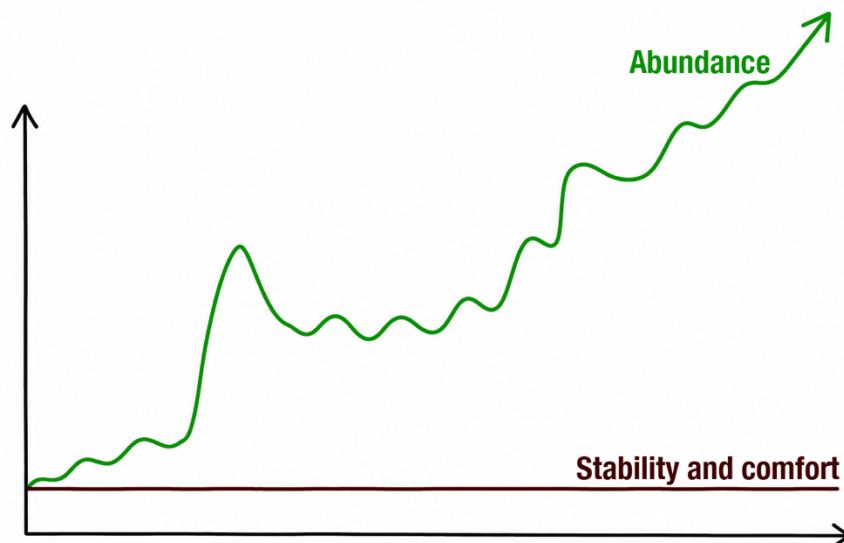

Stability is an anti-growth mechanism.

Stability is the opposite of abundance.

Stability, in other words is stagnancy.

Another wrong word often used in spirituality that blocks the movement is “**rooting**”. In order to ground oneself, most spiritualists often advise rooting into the mother Earth. When you root yourself into something, you lock yourself there. Now the only movement possible is vertical. Rooting and stability are not the positive emotional energies of the root chakra, they aren’t negative either. They are neutral; much like their meanings, they are just there, as it is, without movement, until death. Grounding means touching the land, that’s it. You are not a tree; therefore, you have no roots. You have feet that touches the ground. Being in the present moment in the present space is grounding. Grounding simply means being present. So, when you wish to ground yourself, just be present in the present current physical reality and space and you are done. No visualisations required, no affirmations needed. You are grounded. Period!

I am not even rooted in my family or lineage. I have no roots; hence I have no rooting. Why will I limit myself to one family, I would ask for every nice family of the Earth to consider me their child and fill me with love, abundance, care, nurturing and growth. Rooting is locking, and locks are blocks. I will never lock myself to one guy, if I love him, I will always love him. I don’t need to be romantically involved with him to love him and care for him. I can love him as a boyfriend today and as a friend tomorrow. Love has gotten nothing to do with relationships. I will never lock us into specific roles and diminish our love. I will always keep all the doors and windows open for more love to flow into our lives. If in spite of thousands of available options and hundreds of involvements we choose to prioritise each other, it’s our choice, but not a binding, not a compulsion. The more you limit yourself and others, the more you block abundance.

Majority of married couple are deeply unhappy with their married lives and yet do not leave their partners, one, because of their need for “stability”, two, for “comfort” (the neutral emotional energy of the heart chakra). I call these people **ordinary-dead-breathing human beings**. They are breathing, but they aren’t truly living. They are mechanically and unconsciously going on with their lives in the same cycle, stagnant at the same emotions, same thoughts, same routines and same incomes. Their arguments are same, their talks are same, and their lives are same, until their dying breath. This is what the life becomes when you need, want, will, wish and desire stability and comfort.

Your prayers, irrespective of anything, should always begin with:

“I ask for the fear of failure, fear of lack and the fear of change to be immediately, completely, absolutely, permanently, irreversibly and eternally extracted and destroyed, from the points of their creations, from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my pasts, my presents, my futures, my environments, my surroundings, my atmospheres, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.

I ask for my need for stability, my need for comfort and my comfort with stability to be immediately, completely, absolutely, permanently, irreversibly and eternally extracted and destroyed, from the points of their creations, from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my pasts, my presents, my futures, my environments, my surroundings, my atmospheres, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.”

Stability and comfort can never manifest abundance, because abundance is growth, movement and flow oriented. It requires constant change, in partners, in professions, in mindsets, in spaces and in places. Stability and comfort require you to stay exactly where you are and how you are.

Marriage is my most favourite example on this topic. My first ever realisation in life, at the age of three, was that marriage is the stupidest thing on this planet.

Let us consider the reasons for marriage:

First, stability. Mostly its financial and emotional stability.

Second, fear of loneliness. According to people it is better to live every single moment of one’s life in unhappiness than being alone. A powerful-growth-oriented person would work on themselves and make themselves independent in every area of life so that they do not have to tolerate toxicity for one moment.

Third, who will take care of us in our old age. So basically, looking forward to an in-house nurse.

Fourth, need for identity. Identifying themselves as husband-wife gives them a purpose, a sense of identity and a sense of achievement. I truly feel sorry for the lives that find achievements in marriage and having kids. Even pigs can do that. I can seriously just get pigs married, have sex and then have kids only to make a point.

Fifth, binding. People don’t marry for love, people marry to bind and possess. They always treat their partners as bandhwa majdoor (bonded labour) and their personal properties. There is no freedom or individuality left. But to be honest, people who are wanting to get married are the ones who have no individuality to begin with, which is why they aren’t losing it. That is why they seek identity through their partners.

However, I have to admit for most people marriages and these binding societal rules are necessary. In order to live life freely, one needs to have the sense of value, respect and priority. If you know to do right by everyone and everything, you can do no wrong, no matter what you do. But the problem with people is that they lack the sense to treat right. I have seen a lot of married men treat their wives like keeps and their girlfriends like prostitutes. Firstly, keep is a wrong terminology altogether. Again, one can only be “kept” when one is treated like a property. The problem is never in multiple partners, but in not treating the partners right. Even if you are involved with only one man or a woman, but if you treat them wrong then your monogamy is useless, pointless and meaningless. Casanova was Casanova because of the way he made every woman feel. No one cared about him being involved with multiple women because every single woman he got involved with felt safe, wanted, valued and respected. But since most people (both men and women) lack this ability, I would suggest a bound, limited and suffocated life for them. Without sense, all people create is a mess. Messy and messed up people should be bound for the betterment of the humanity at large.

I am not saying that people who seek stability and comfort are worthless, I am saying that worthy people are making their lives petty by choosing limitations (both personally and professionally). The whole and sole purpose of taking human birth is growth. It is highly unlikely and yet when happens, extremely lucky, that two people grow together at the same rate at the same time. Which is why most partners outgrow their spouses creating massive distance between them. Choosing to live in this situation is suffocating and also undoing of whatever growth that had taken place. Similarly, once you have outgrown a job or a profession, leaving it and moving onto the next is the best option if you wish to make money. When you ask for stability and get comfortable in your position and situation, you also block promotions. You may consciously feel like you want to get promoted, but your unconscious and subconscious are pushing the promotion away because you are choosing comfort and stability.

Deities of Money

Deities of money are the Divine Beings that oversee the Energies of Money, Growth, Movement, Transformation, Flow and Freedom. They are the creators, generators, carriers and guardians of these Energies.

Goddess Abundantia (Roman): The divine personification of abundance, flowing success, and prosperity, often depicted holding a cornucopia.

Goddess Fortuna / Tyche (Roman/Greek): The goddess of luck, fortune, and chance, controlling the turning of the wheel of fate and prosperity.

Goddess Lakshmi: The ultimate deity of wealth, fortune, luxury, and spiritual and material abundance.

Lord Kubera: The treasurer of the gods and the overseer of hidden wealth, treasures, and material assets.

Lord Ganesha: The remover of obstacles who is invoked alongside Lakshmi to bring wisdom and intellect (Buddhi) to wealth management.

God Plutus (Greek): The actual personification of wealth and agricultural abundance.

God Hermes / Mercury (Greek/Roman): The deity of commerce, trade, financial transactions, and luck.

God Caishen (Chinese): The immensely popular Chinese god of wealth, invoked heavily during the New Year to bless businesses and personal finances.

Budai / The Laughing Buddha (Chinese/Buddhist): While an archetype of contentment, he is universally revered as a bringer of prosperity, good luck, and financial abundance.

Goddess Daikokuten (Japanese): One of Japan's Seven Lucky Gods, specifically presiding over wealth, commerce, and the household.

Goddess Benzaiten (Japanese): The goddess of everything that flows—music, water, knowledge, and fluid monetary wealth.

God Njord (Norse): The god of the sea, seafaring, and wealth. In Viking times, a wealthy person was said to be "as rich as Njord," as sea trade and fishing drove their economy.

God Freyr (Norse): The deity of fertility, sunshine, bountiful harvests, and material peace.

God Cernunnos (Celtic): The horned deity associated with the wild, fertility, and material prosperity, often depicted holding a torc (a symbol of wealth) and a purse of coins.

Goddess Oshun (Yoruba / Diaspora): The deity of sweet waters, beauty, luxury, gold, and material abundance.

God Ekeko (Andean/Inca): The Tiwanakan God of wealth and prosperity, traditionally kept as a statuette to which people attach miniature versions of the things they wish to manifest.

manifesting money

Step 1

The Sigil and the Yantra.

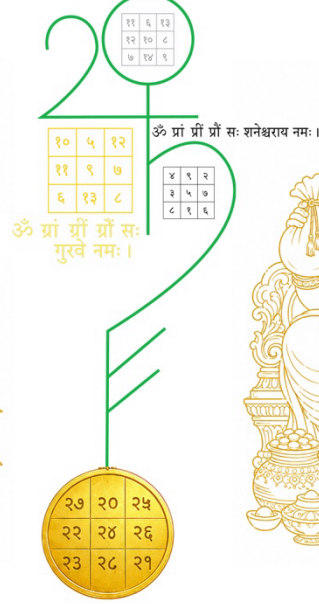

I have created this Yantra and the Sigil for manifesting money. My advice would be to draw it with your own hands even if you aren't good with drawing. That creates quicker and deeper connection with the Forces being invoked. You can print it out as well, but the connection of your Yantra and Sigil will remain stronger with me than with you. Many witches and spiritualists ask to print the sigils they made because they want to get some results every time their created sigils are used. Which is why I always say, it is okay if your drawing is not good, the point is not about you showing your artistic skills to the Divine Beings, it is about connecting with the Divine Beings. When you draw it with your own hands, you cut me out of the connection. When you use the exact same image, I remain its creator and hence within the equation. You can draw it exactly as it is in the image I share with you, that wouldn't connect me with the Yantra or the Sigil. Because trust me, you will naturally end up making it different somewhere or the other. Even if you are an excellently skilled artist, you would still have some positional changes, even if they are too minute to be noticed. This personalises the whole thing and leaves me out of your manifestation.

Sigils are communication language used to communicate our intention with drawing. Yantra contains the intention and traps it into a piece of paper or whatever material is used to create it.

श्रीं वक्रतुण्ड महाकाय सूर्यकोटि समप्रभ निर्विघ्नं कुरु मे देव सर्वकार्येषु सर्वदा

ॐ द्रां द्रीं द्रौं सः शुक्राय नमः ।

ॐ ह्रीं श्रीं क्रीं श्रीं कुबेराय अष्ट-लक्ष्मी मम गृहे धनं पुरय पुरय नमः

ॐ श्रीं ह्रीं क्लीं त्रिभुवन महालक्ष्मये अस्माकं दारिद्र्य नाशाय
प्रचुर धन देहि देहि क्लीं ह्रीं श्रीं ॐ

This is the Yantra.

The image you need to draw with the same colours. Even if you do not know Hindi and Sanskrit, just write it down in your Yantra drawing as it is.

Elements of the Yantra

A **green square box**: Yantras are always enclosed within a square, circular or rectangular shape to contain, protect and direct the energies in.

Mantra 1: श्री वक्रतुण्ड महाकाय सूर्यकोटिसमप्रभ। निर्विघ्नं कुरु मे देव सर्वकार्येषु सर्वदा॥

Shree Vakratunda Mahakaaya, Suryakoti Samaprabah. Nirvighnam Kuru Me Deva Sarva Karyeshu Sarvadha

The reason behind starting with Lord Ganesha is because he is the remover of obstacles (blocks). When you invoke him he clears out the space for the rest of the Divine Forces and accelerates the manifestation process.

The mantra literally means I call upon you lord Ganesha to remove all the obstacles and accomplish my work successfully.

Image of Lord Ganesha: You can avoid drawing it if you wish, however a simple outline drawing will strengthen the connection.

The sigil:

The Sigil is a conjunction of Jupiter, Venus and Saturn, the three Gurus in the Planetary System. Jupiter is the teacher of the Gods and Goddesses, Venus is the teacher of demons and Saturn is the teacher of Karma (lessons). Guru (Jupiter), Shukra (Venus), and Shani (Saturn) are the three absolute powerhouses of wealth in astrology. Together they are a massive, multi-layered wealth-generating engine. However, because they are three very different energies, they don't just hand you a lottery ticket; they build a complex, bulletproof financial structure. This trinity operates as a wealth-creation team. This conjunction creates **bulletproof abundance**.

If you only had Jupiter and Venus active, you might get sudden, massive influxes of money, but you might also blow it all on luxury or lose it due to over-optimism. Saturn prevents that. It acts as the financial manager. He ensures that the wealth generated by Jupiter's luck and Venus's magnetism is channelled into long-term, rock-solid investments (like property, gold, or permanent assets).

Saturn's presence means the abundance usually follows a strict law: it builds over time. It blocks overnight, unearned success. He demands that you build a solid foundation, learn your lessons, and master your craft. Because of this, the financial abundance under this conjunction tends to start with steady, disciplined effort but snowballs into massive, unbreakable abundance later. It creates a graph that only goes up. Being the Lord of Karma, Saturn also helps remove the Karmic Blocks.

Because Jupiter's knowledge and wisdom and Venus's creativity and design are combined under the structural eye of Saturn (execution), this money doesn't come from mindless labour. It comes from bringing deep, high-value concepts or creative designs into physical reality.

This Sigil will not just get you little money, it has the power to make you a business tycoon. The time it takes to do that; is the time you will take to remove your blocks and develop the necessary skills. But some amount of money will begin to flow in with the removal of every block.

This is an absolute wealth-bringing combination.

The Venus Yantra and Mantra:

ॐ द्रां द्रीं द्रौं सः शुक्राय नमः (Om Draam Dreem Drawm Sah: Shukraya Namah)

११	६	१३
१२	१०	८
७	१४	९

This Yantra and Mantra acts as an invocation and activation of Venus. This is not just the mantra of Venus, but the beeja mantra (seed mantra) of Venus. The numbers are in Hindi here, but you can write it down in English as well.

The Jupiter Yantra and Mantra:

ॐ ग्रां ग्रीं ग्रौं सः गुरुवे नमः (Om Graam Greem Graum Sah: Guruve Namah)

१०	५	१२
११	९	७
६	१३	८

This Yantra and Mantra acts as an invocation and activation of Jupiter. This is not just the mantra of Jupiter, but the beeja mantra (seed mantra) of Jupiter. The numbers are in Hindi here, but you can write it down in English as well.

The Saturn Yantra and Mantra:

ॐ प्रां प्रीं प्रौं सः शनैश्चराय नमः (Om Praam Preem Praum Sah: Shanaishcharaya Namah)

४	९	२
३	५	७
८	१	६

This Yantra and Mantra acts as an invocation and activation of Saturn. This is not just the mantra of Saturn, but the beeja mantra (seed mantra) of Saturn. The numbers are in Hindi here, but you can write it down in English as well.

The Goddess Lakshmi image on the left: This image is optional. Drawing would deeper the Energies of Goddess Lakshmi into the Yantra, but not drawing it wouldn't reduce the effect.

The Lord Kuber image on the right: This image is optional. Drawing would deeper the Energies of Lord Kuber into the Yantra, but not drawing it wouldn't reduce the effect.

Fehu: Fehu is a rune that looks like an F. It is connected to the sigil in the Yantra at the bottom right before Kuber Mantra. It is pronounced "Fa-Hew". It is the Money Rune that helps generation and multiplication of Money.

Kuber Yantra: Draw it in gold, however, you can make it in a square shape instead of circle.

Kuber Mantra: ॐ ह्रीं श्रीं क्लीं श्रीं कुबेराय अष्ट-लक्ष्मी मम गृहे धनं पुरय पुरय नमः ॥

Om Hreem Shreem Kleem Shreem Kuberaya Ashta-Lakshmi Mama Grihe Dhanam Puraya Puraya Namah //

This mantra is an invocation to Kubera and Ashta Lakshmi for wealth, prosperity, abundance, and financial growth in the home.

Lakshmi Mantra: ॐ श्रीं ह्रीं क्लीं त्रिभुवन महालक्ष्म्यै अस्माकं दारिद्र्य नाशाय प्रचुर धनं देहि देहि क्लीं ह्रीं श्रीं ॐ ॥

Om Shreem Hreem Kleem Tribhuvan Mahalakshmyai Asmakam Daridrya Nashaya Prachur Dhanam Dehi Dehi Kleem Hreem Shreem Om //

This mantra invokes Mahalakshmi to remove poverty and bless the devotee with abundant wealth, prosperity, and financial abundance.

Invocation of the *Yantra*

First finish drawing the Yantra with the right colours. Green is for Growth, gold is for Money, red is for Power, black is the colour of Saturn, yellow is the colour of Jupiter and silver is the colour of Venus.

Starting the ritual during Moon's waxing phase is always advisable. New Moon is the best, however since there are multi-Deities involved, any day of the week is fine.

This Yantra should always be placed standing. Do not place it horizontally on the table, stand it with a support of small easels. Always place it on the altar table and never directly on the ground.

Light an incense and a candle / diya in front of it.

Step 1: Touch the Lord Ganesha image or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Lord Ganesha.

Step 2: Touch the Goddess Lakshmi image or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Goddess Lakshmi.

Step 3: Touch the Lord Kuber image or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Lord Kuber.

Step 4: Touch the Venus yantra or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Lord Venus (Shukra).

Step 5: Touch the Jupiter yantra or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Lord Jupiter.

Step 6: Touch the Saturn yantra or mantra with your dominant hand's index finger and middle finger and chant the mantra as many times as you feel like. This is the invocation of Lord Saturn.

Step 7: Touch Fehu with your dominant hand's index finger and middle finger and chant its name (Fa-Hew) as many times as you feel like. This is the invocation of the rune Fehu.

I would suggest you do this everyday forever. As I said, money should keep flowing in. Doing this everyday keeps the gates open and money inflow intact.

While Jupiter, Venus and Saturn form the core corporate board of long-term material wealth, the other planets too act as the specific departments that handle how that money is generated, processed, and experienced. Every single planet has a unique financial identity. Based on your skills, you can add the planets to your main sigil.

Mercury (Budha) ♀ - The Trader & Intellectual Capital

Mercury is the brain that figures out how to trade. Mercury rules commerce, intellect, calculation, data, writing, and communication. It is the absolute king of business acumen. A strong Mercury brings wealth through clever negotiation, entrepreneurship, trading, freelancing, content creation, or digital platforms. It gives the ability to spot market gaps and turn ideas into quick, fluid cash.

Mars (Mangal) ♂ - The Entrepreneur & Real Estate Power

Mars provides the sheer willpower, execution energy, and courage required to build an empire. Mars rules land, immovable property, construction, engineering, and raw energy. Mars gives you the grit to take financial risks. It drives wealth creation through physical assets (real estate, agriculture), building businesses from scratch, or conquering highly competitive industries. It is the energy of "active hustle."

The Moon (Chandra) ☾ - The Public Magnet & Market Instincts

The Moon governs the mind, emotions, and the masses. You cannot have massive, public-facing wealth without a well-placed Moon. The Moon rules public popularity, consumer mindset, fluid capital, and intuitive fluctuations. A powerful Moon indicates that your wealth is deeply tied to public approval. It thrives in industries catering to the masses—hospitality, food, art, or mass media. It also gives an uncanny, intuitive "gut feeling" for stock markets and consumer trends.

The Sun (Surya) ☉ - The Authority & Power-Based Wealth

The Sun doesn't care about day-to-day trading, the Sun cares about legacy, power, and sovereignty. The Sun represents the government, high administration, leadership, and personal brand. The Sun brings wealth through holding top executive positions, government contracts, politics, or building an unmistakable, high-status personal brand. It is wealth that comes specifically because of who you are and the authority you command.

The Shadow Planets: The Wildcards of Wealth

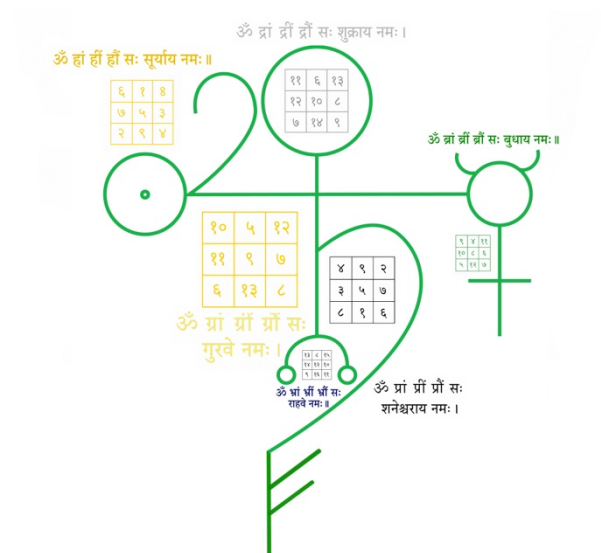

Rahu (North Node) ☊ - The Sudden Windfall & Obsession

Rahu is the ultimate cosmic amplifier. It represents insatiable hunger, foreign elements, and boundary breaking. Invoke Rahu for Speculation, massive, unexpected windfalls, sudden wealth surges, and global/foreign income. When Rahu hits a wealth house (like the 11th house of gains), it behaves like a volcanic eruption of money. It brings wealth through unconventional channels—advanced technology, international markets, viral fame, or massive speculative wins. It creates an obsession with breaking financial ceilings.

Ketu (South Node) ☋ - The Ghost Wealth & Hidden Sources

Ketu is notoriously known as the planet of detachment, but it has a massive hidden financial power that people often overlook. It brings inheritance, sudden discoveries, esoteric/occult monetization, and "invisible" wealth. Ketu brings wealth when you aren't desperately chasing it. It rules profits made from deep research, hidden or underground sources, software backend work, or spiritual/metaphysical professions. It is the signature of the "silent earner" who accumulates resources without needing to flash them to the world.

I will give an example sigil for someone trading in stock markets. It will give you an idea of how you can modify your sigils.

I have added Mercury, Sun and Rahu Yantras and Mantras to the original sigil for stock market. Some of you may feel that the sigil has become heavier, while others it may find it immensely powerful. Sometimes, the placements of planets in the horoscopes and how which planet is affecting us changes how the sigil would affect us. My advice would be to not function from greed and go by intuition.

The first three Guru Planets are often more than enough unless specifically required. **Jupiter is the Multiplier** representing massive expansion, cosmic luck, banking, wisdom and the overall capacity to attract big opportunities and capital. **Venus is the Magnet** representing liquid cash, luxury, assets, comforts and the ability to attract wealth effortlessly through magnetism and value. **Saturn is the Vault and the Builder** representing long-term assets, real estates, massive structures, sustainability and the discipline to lock wealth down so it never leaves.

The *prayer*

Once the sigil is activated, you read the following prayer.

“I call upon Lord Ganesha, Goddess Fortuna, Goddess Abundantia, Goddess Lakshmi, God Kuber, Lord Saturn, Lord Jupiter and God and Goddess Venus for the immediate, absolute, complete, permanent, irreversible and eternal manifestation of the following prayer:

I ask for the fear of failure, fear of lack and the fear of change to be immediately, completely, absolutely, permanently, irreversibly and eternally extracted and destroyed, from the points of their creations, from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my pasts, my presents, my futures, my environments, my surroundings, my atmospheres, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.

I ask for my need for stability, my need for comfort and my comfort with stability to be immediately, completely, absolutely, permanently, irreversibly and eternally extracted and destroyed, from the points of their creations, from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my pasts, my presents, my futures, my environments, my surroundings, my atmospheres, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.

I ask for all the guilts and fears of being rich, being abundant, being wealthy, being lucky, being blessed and being affluent to be immediately, completely, absolutely, permanently, irreversibly and eternally removed and destroyed from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my environments, my surroundings, my atmospheres, my pasts, my presents, my futures, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.

I ask for all the cords, hooks, anchors, ties, entities, energies, spirits, beings, parasites, servitors, tools, means, mediums, modes, instruments and mechanisms that are draining, depleting, taking, snatching and stealing my abundance, success, growth, movement, flow, transformation, freedom, upliftment, money, safety and security to be immediately, completely, absolutely, permanently, irreversibly and eternally removed and destroyed from every cell of my physical body, every fibre of my being, every layer of my existence, all of my minds, all of my neurological pathways, my fates, my destinies, my fortunes, my environments, my surroundings, atmospheres, my pasts, my presents, my futures, all of my security systems and all of my timelines, across all dimensions, realities, realms, lifetimes, timelines and planes of existences.
